

LANE4 Closes Deal with Google

LANE4 Property Group - July 2012

July 16, 2012. KANSAS CITY, Kan.

LANE4 Property Group, INC. has completed an agreement with Google to lease space for their Google Fiber Headquarters. Located at 1814 Westport Road, Kansas City, KS, the headquarters serve as office space as well as a face for the Google Fiber movement in general. The public is invited to visit the “Fiber Space,” as Google calls it, to experience Google Fiber first-hand. Visitors can try out the mega-high speed internet and television, and chat with Google Fiber team members about the new technology. Google will also host multiple events at the Fiber Space to show the vast capabilities of Google Fiber. These events will be free to the public, and include things like fitness classes, cooking classes, and town hall style meetings. Area business owners will conduct the classes at their normal place of business, and participants will follow along at Fiber Space via streaming video.

Google Fiber is a fiber based internet connection allowing internet speeds up to 100 times faster than what is available today. The technology will be available in neighborhoods throughout Kansas City, KS and Kansas City, MO. Interested consumers are encouraged to pre-register for the service, and neighborhoods with the highest number of pre-registrants will receive service first.
